

Marty Thau, the music impresario behind The New York Dolls, Blondie and Suicide proudly presents ... LOLA DUTRONIC, who release their latest EP "Musique" on Red Star Digital Music on May 18, 2010

LOLA DUTRONIC are an Electronic Pop duo who divide their time between Berlin and Toronto. Singing in both English and French, vocalist Lola Dee and producer/composer Richard Citroen combine elements of French Pop, Lounge, Electro, Bond Themes and Euro Disco often within the same song. Their debut album came out in 2005, they have been featured on "The L-Word" and were up for a Grammy nomination in 2007.

The "Musique" EP, featuring the single "Beautiful World (Slight Return)", is their first release for Red Star Digital Music and will available at iTunes and most other digital outlets.

On a biographical note, with a background in opera and jazz, Lola Dee has been performing on stage in her native Germany since the age of 5, while Toronto-based Richard Citroen is a former member of Canadian "new wave" legends, The Diodes ("Tired Of Waking Up Tired").

The "Musique" EP is the great record Lola Dutronic have been threatening to make for years.
